

Queensland Science Network

Royal Society of Queensland

The Royal Society of Queensland

*Representing
Queensland learned
inquiry since 1884*

The Society hosts the
Queensland Science
Network, a collaboration
between more than 23
non-government
scientific societies.

**The Queensland Science Network is a
collaboration between Queensland's
science societies to promote science
events and activities and to share
knowledge.**

The Queensland Science Network

The Queensland Science Network fosters collaboration between organisations involved in science and natural history to:

- Introduce the public to a range of community-based scientific organisations
- Promote the value of science and encourage involvement in scientific activities
- Publicise activities, resources and events by member groups
- Advocate on issues of common concern
- Maintain an online library of publications, teaching materials, citizen science reports and other forms of documented scientific knowledge, accessible to all.

‘Science’ is the application of scientific method to observations about the biophysical world.

The Network is hosted by The Royal Society of Queensland, the senior learned academy in the State. Applications to join the Network are invited from societies representing all branches of science. Participating groups are:

- Focused on producing and promoting scientific knowledge
- Active in Queensland
- Neither a commercial firm nor professional institute
- Not primarily a lobby group.

Each member group maintains its own index page, with its summary information and website link.

The Network was born at a meeting held in Brisbane in October 2016 and is strictly non-partisan and independent of government. It is at an early stage of development.

A wide range of opportunities is available for volunteers or philanthropists to become involved in operating the Network and so support scientific activities, with enduring public benefit. For example, the Network is hosting a project to convert data collected by member societies during field excursions into teachers’ kits to support the Queensland senior science syllabus.

Enquiries are welcome.
